

GEOFOTO – COMPANY PROFILE

Geofoto d.o.o. is a Croatian company which offers photogrammetric, geoinformatics, cartographic and cadastral services. The company began to operate on 1st September 1993 in Zagreb, where the headquarters are still located. Geofoto also has a subsidiary in Dubai, U.A.E. and a "sister" company, Geofoto - International d.o.o., in Zagreb. The scope of the company's work includes aerial survey, design and creation of geoinformation systems and solutions, digital cartography, analytical and digital photogrammetric mapping, cadastral survey, as well as production of topographic and cadastral databases. Our services are known for their top quality and high expertise,

along with honest and transparent relationships, a strong IT structure, high standards of compliance and many years of international experience. In addition to Croatian government bodies (State Geodetic Administration, Ministry of Urban Planning and Environmental Protection, Ministry of Defense etc.), the company works for foreign governments (Switzerland, Belarus, Italy, Albania, Moldavia, Norway, Hungary, Ukraine, Serbia and Montenegro, Bosnia and Herzegovina...), city administration offices (City of Zagreb, City of Rijeka and others), agencies (Croatian Mine Action Centre, Croatian Roads, PlinaCRO, INA) and numerous other contractors. The company is equipped with two airplanes CHEYENNE I and TURBO PIPER AZTEC, one of which has the LEICA RC 20 camera system with GPS CCNS4 kinematics GPS device, and the other a VEXCEL digital camera. The VEXCEL camera is one of the few digital cameras for aerial photography in Europe.
