

**VAJA 4: SLEPI POLIGON**

2024/2025

**SLEPI POLIGON**dano:  $A(e_A, n_A)$ ,  $B(e_B, n_B)$ merjeno:  $\beta_B$ ,  $d_{BC}$ ,  $\beta_C$ ,  $d_{CD}$ iščemo:  $C(e_C, n_C)$ ,  $D(e_D, n_D)$ 

Izračun koordinat točke C:

i)  $v_B^C = v_A^B + \beta_B - 180^\circ$

ii)  $\Delta e_B^C = d_{BC} \sin v_B^C$        $\Delta n_B^C = d_{BC} \cos v_B^C$

iii)  $e_C = e_B + \Delta e_B^C$        $n_C = n_B + \Delta n_B^C$

Izračun koordinat točke D:

i)  $v_C^D = v_B^C + \beta_C - 180^\circ$

ii)  $\Delta e_C^D = d_{CD} \sin v_C^D$        $\Delta n_C^D = d_{CD} \cos v_C^D$

iii)  $e_D = e_C + \Delta e_C^D$        $n_D = n_C + \Delta n_C^D$

V primeru, da je vrednost izračunanega smernegota:

- $v < 0^\circ \rightarrow v = v + 360^\circ$ ,

- $v > 360^\circ \rightarrow v = v - 360^\circ$ .
